Before using your Color-aid 220 packet, number reverse side of each sheet as shown in this chart. Use a soft pencil with an eraser. Do not press hard to prevent marring. Read all instructions before starting.

(1) Have 220 deck ready with bright yellow side facing up. (2) Turn this first yellow sheet over and write in "1" at a corner. (3) Continue in this manner until you arrive at sheet #220. (Ignore the printing you may encounter on some sheets.)

Note: Errors will throw off numbering. If last sheet in deck is not #220, you have at least one of four error types: stuck sheets, duplicate colors, wrong numbering or, in very rare cases, a missing color.

Optional: After numbering, write in the 220 Color-aid designations: Color #1 = Y-HUE, color #2 = Y-T1 ... color #84 = RV-T3 ... color #192 = YGY-S3 ... color #206 = GRAY 7 ... color #218 = COBALT BLUE, etc.

GRAY			
1A	193	5A	201
1	194	5	202
2A	195	6A	203
